Practical completion inspection

Room-by-room checklist to work through before issuing a practical completion notice, from the template pack's PC checklist.

Project		Date	
Completed by		Signature	

Walk the job with this list before issuing the Practical Completion Notice. Anything not done becomes a line in the Defects List, with a trade and a priority. Skip "if in scope" items that aren't in the contract.

Certificates are part of PC: have the waterproofing, electrical, plumbing and gas certificates in hand, and the occupation certificate where the state requires one, before telling the client the works are complete (handover documents).

External: Site

Item	Done	Notes
Driveway and paths complete, clean, no damage	☐	
Landscaping complete per contract/plans	☐	
Retaining walls complete and drainage functional	☐	
Fencing complete (if in scope)	☐
