Quality hold points

Checks to sign off at each stage before the work is covered up: slab, frame, pre-lining, fixing and PC, with who checks each one.

Project		Date	
Completed by		Signature	

A hold point is a check that must pass before work continues, usually because the next step covers it up. Record each sign-off (date and who) in the site diary, and keep the certificates for the claim support pack and for handover. The certifier's mandatory inspection stages come from the approval conditions; see each construction phase.

Foundations & Slab

Hold point	Checked by	Done
Set-out check (boundaries, levels, setbacks)	Surveyor	■
Excavation / pier holes — depth, size, soil conditions	Engineer / Builder	■
Reinforcement — size, spacing, cover, tie wire, chairs	Engineer / PCA	■
Plumbing rough-in under slab	Plumber / Hydraulic	■
Termite treatment / barrier installed	Pest company	■
Vapour barrier / membrane installed correctly	Builder	■
Pre-pour inspection (PCA mandatory hold point)	PCA / Certifier	■

Frame Stage

Hold point	Checked by	Done
Frame erected to approved plans	Builder / Carpenter	■
Bracing installed per engineer's details	Builder	■
Tie-down / cyclone connections (if applicable)	Builder	■
Window and door openings checked against schedule	Builder	■
Frame inspection (PCA mandatory hold point)	PCA / Certifier	■
Wet area frame waterproofing prep	Builder	■

Pre-Lining / Lock-Up

Hold point	Checked by	Done
Roof covering complete and weatherproof	Roofer / Builder	■
Sarking / roof blanket installed	Builder	■
Windows and external doors installed	Builder	■
Plumbing rough-in (top-out) complete	Plumber	■
Electrical rough-in complete	Electrician	■
Insulation installed to NCC requirements Insulation /	Builder	■
Waterproofing to wet areas (PCA hold point)	PCA / Certifier	■
Pre-lining / pre-plaster inspection	PCA / Certifier	■

Fixing & Fit-Off

Hold point	Checked by	Done
Plasterboard fixed, joints and cornices complete	Plasterer	■
Joinery and cabinetry installed to plan	Joiner	■
Tiling complete — falls, grout, waterproof integrity	Tiler	■
Painting complete — prep, coats, finish quality	Painter	■
Plumbing fit-off — taps, toilets, hot water	Plumber	■
Electrical fit-off — GPOs, lights, switches, smoke alarms	Electrician	■
Flooring installed and protected	Floor layer	■

Practical Completion

Hold point	Checked by	Done
Final clean complete	Cleaner / Builder	■
All defects rectified from internal inspection	Builder	■
Smoke alarms tested and compliant	Electrician	■
Final plumbing compliance certificate	Plumber	■
Final electrical compliance certificate	Electrician	■
Occupation certificate issued	PCA / Certifier	■
Client handover inspection completed	Builder / Client	■
